## Package : Entity

### Entity ( )
- + private _currentHitPoints : int
- + public currentHitPoints ( )
- + public maximumHitPoints
- + Entity ( currentHitPoints , maximumHitPoints
- + public PropertyChanged
- + protected onPropertyChanged ( name : string ) . event

### Player ( )
- + private _gold : int
- + private _experiencePoints : int
- + public currentLocation : Location
- + public currentWeapon : Weapon
- + public Inventory : List < InventoryItem >
- + public createDefaultCharacter ( )

### Monster ( )
- + public ID : int
- + public name : String
- + public maximumDamage : int
- + public rewardGold
- + public lootTable : List < Loot Item >

## Package : Wall

### Wall ( )
- + public isDoor : boolean
- + public isBarrier : boolean
- + public isPassable : boolean
- + public Wall ( isDoor : boolean , isBarrier : bool , isPassable : boolean )

### Door
- + public keyValue : int
- + private haskey : bool
- + private islocked : bool

### Barrier
- + public isGridXPassable : bool
- + public isGridYPassable : bool

## Package : Item

### Item ( )
- + public ID : int
- + public name : String
- + public namePlural : String

### Weapon ( )
- + public minimumDamage : int
- + public maximumDamage : int

### HealingPotion ( )
- + public amountToHeal : int

### InventoryItem ( )
- + public details : Item
- + public quantity : int

### Reward ( )
- + public ID : int
- + public name : String
- + public isKey : false

## Package : Floor

### Grid ( )
- + public posX : int
- + public posY : int
- + public Grid ( )

### Trap ( )
- + public damage : int

## Package : Room

### Room
- + private Wall ( ) : Wall
- + private popEnemy ( ) : bool
- + private popTraps ( ) : bool
- + public Room ( ) : Room
- + public enemyCount : int
- + public ID : int
- + public name : String

### Maze
- + public genRooms : bool
- + public genKeys : bool
- + public genEnemies : bool
